- NGOs and research institutions

Our Services

Ecology and Threatened Species
- Threatened species surveys
- Flora, fauna, and habitat assessments
- Constraints and opportunity analysis
- Biodiversity and species management plans

Monitoring and Rehabilitation
- Threatened species translocation
- Water quality monitoring
- Rehabilitation and revegetation strategies
- Carbon farming and Accounting for Nature frameworks

Environmental Management and Approvals
- Project approvals (Local, State, Federal)
- Environmental impact statements
- Fauna spotter-catcher services
- Environmental management plans (construction)
- Offset area management and approvals

Environmental Project Management
- Stakeholder engagement and community consultation
- Conservation research design
- GIS analysis and mapping, including drone imagery
- Data management
- Government referrals

Significant Project Experience

We have a reputation for delivering high-quality environmental solutions, with over 56% of our projects from repeat clients.

- **Mt Emerald Wind Farm:** Eight years of environmental management covering compliance, approvals, offset surveys and long-term monitoring.
- **RATCH Australia:** Threatened species population research including extensive radio-tracking and trapping of northern quolls and greater gliders.
- **Queensland Government:** Constraints assessments identifying suitable development lots to support housing and cultural security for multiple First Nations communities across Cape York.
- **Envirofin:** Fauna spotter-catching, weed surveys, water monitoring, and environmental auditing for the $164 million Smithfield Bypass project.
